Continuation of 3. NOTE: Applicant has amended claim 1 from 'a secondary carpet backing comprising a woven fabric of a single layer, plain, flat weave construction' to 'a secondary carpet backing consisting essentially of a single layer of a woven fabric of a plain, flat weave construction.' While the term "single layer" now modifies the woven fabric rather than the weave construction and while the transitional phrase has been changed from "comprising" to "consisting essentially of," said amendment is insufficient to overcome the 103 rejection of the claims over Smith '145. Specifically, as previously argued (paragraph spanning pages 3-4 of Final Rejection), Smith teaches a single layer of a woven fabric having a plain, flat construction (i.e., base of conventional secondary backing in inventive modified secondary backing). Note applicant's claims still do not exclude the needled fiber batt for two reasons. First, during examination, absent a clear indication in the specification or claims of what the basic and novel characteristics of the invention actually are, "consisting essentially of" will be construed as equivalent to "comprising." Note MPEP 2111.03. Secondly, the claims are drawn to an intermediate product of a secondary carpet backing, rather than a final carpet product. As such, the preamble limitation to a "secondary carpet backing" is merely descriptive of intended use. Hence, in effect, applicant is only claiming "a single layer of a woven fabric", but the claims do not exclude other layers or materials from being present. Thus, applicant's proposed amendment is insufficient to overcome the standing rejection.

Continuation of 11. does NOT place the application in condition for allowance because: It is based upon a non-entered amendment. Additionally, note the arguments presented above in section 3.

Continuation of 13. Other: Said proposed amendment, upon entry, would be sufficient to overcome the 112, 2nd rejection of claim 1 as set forth in section 5 of the Final Rejection.
